

Assignment 1 - Profile Website

...

Jonas Manalang

Profile Website Site Map

I started my profile website assignment by designing a site map. The site map provided me the basic structure of my websites such as how many total pages, how pages will flow and link together, what components will be required. The site map provided me with the building block for my profile website.

Wire Frame

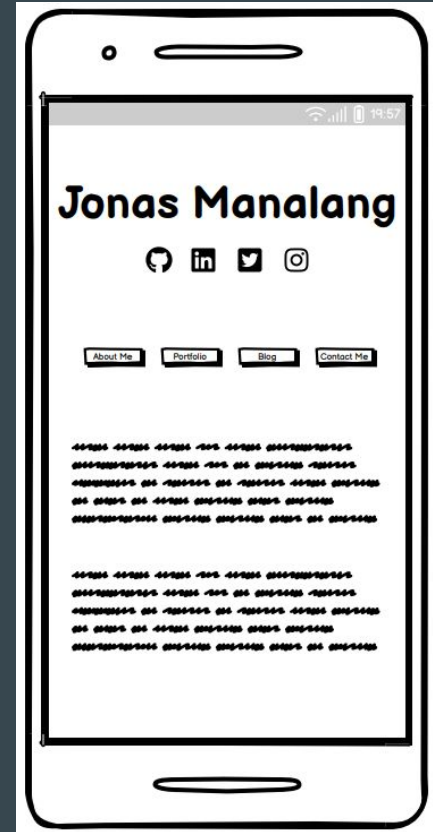

Following on from the site map
I was then able to design a basic wire frame
of my website using Balsamiq.

Design Feature

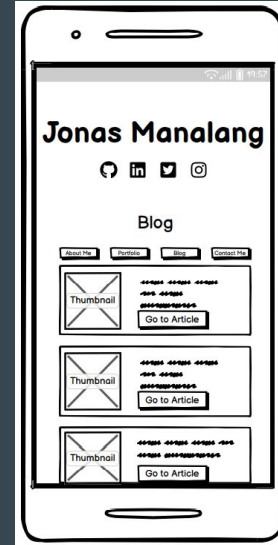

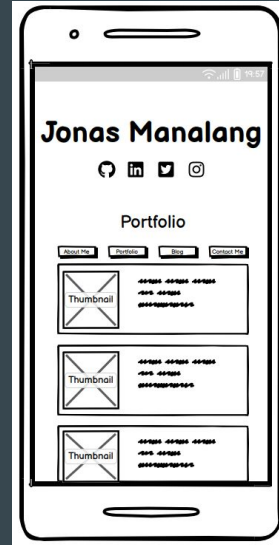

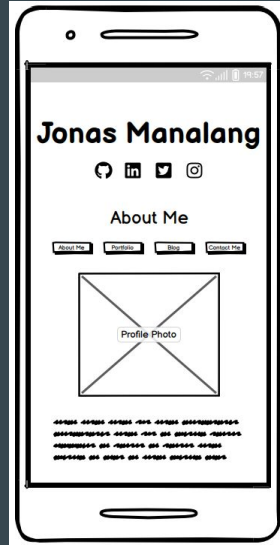

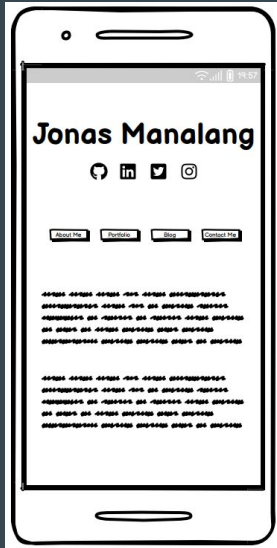

I choose to have a simplistic/minimalist design of my website which incorporates a visual hierarchy to capture my target audience and to orderly funnel them through my profile website.

Mobile First Design

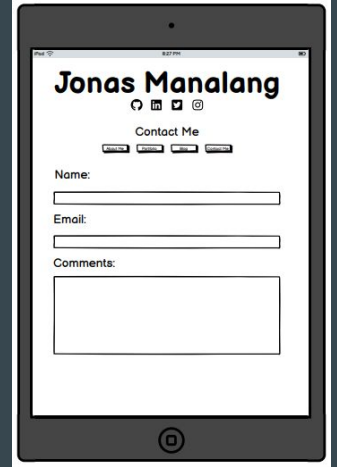

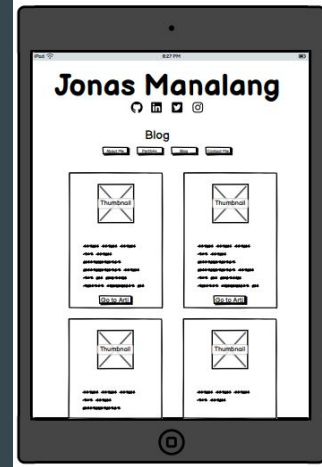

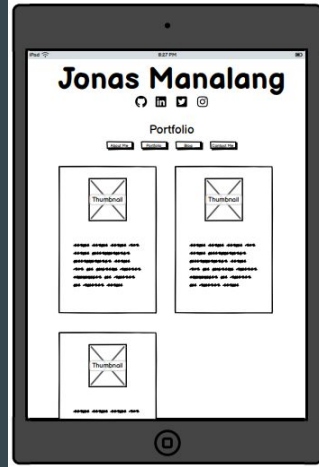

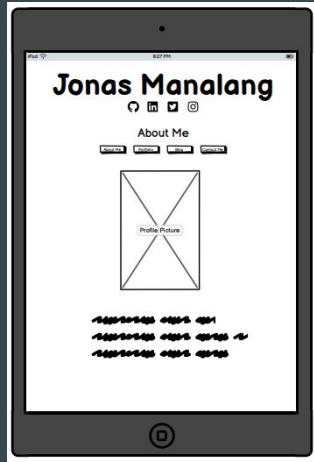

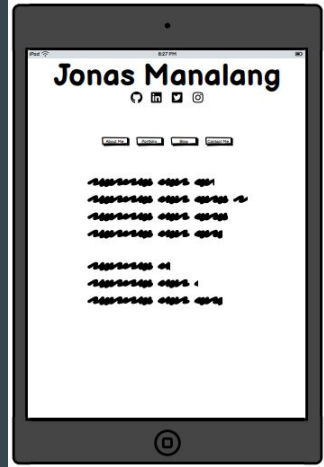

As almost 60% of overall web traffic are coming from mobile devices, I started my design process with a mobile-first approach.

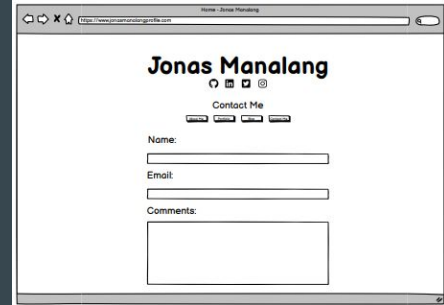

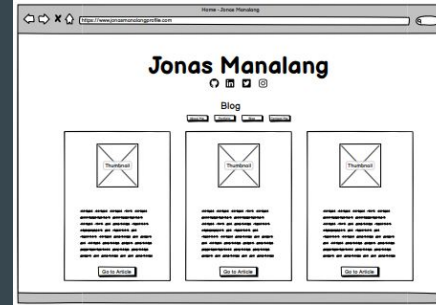

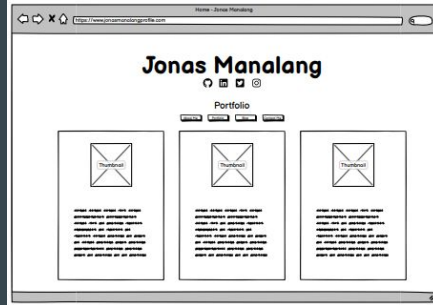

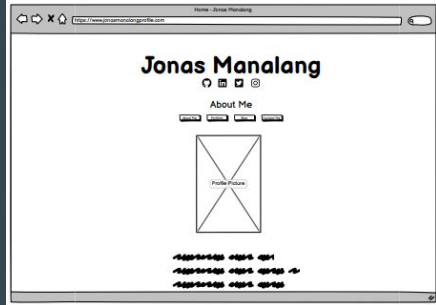

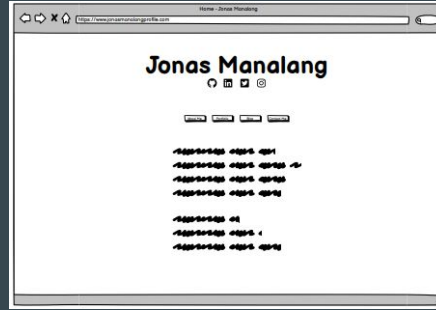

Mobile Design

Tablet Design

Desktop Design

Website Components

My profile website layout is a centered grid concept to orderly funnel my audiences in a structured manner.

Keeping with the simple and minimal concept, I incorporated basic components for my profile website.

I used prominent headings and plain text throughout my website to effectively deliver my message.

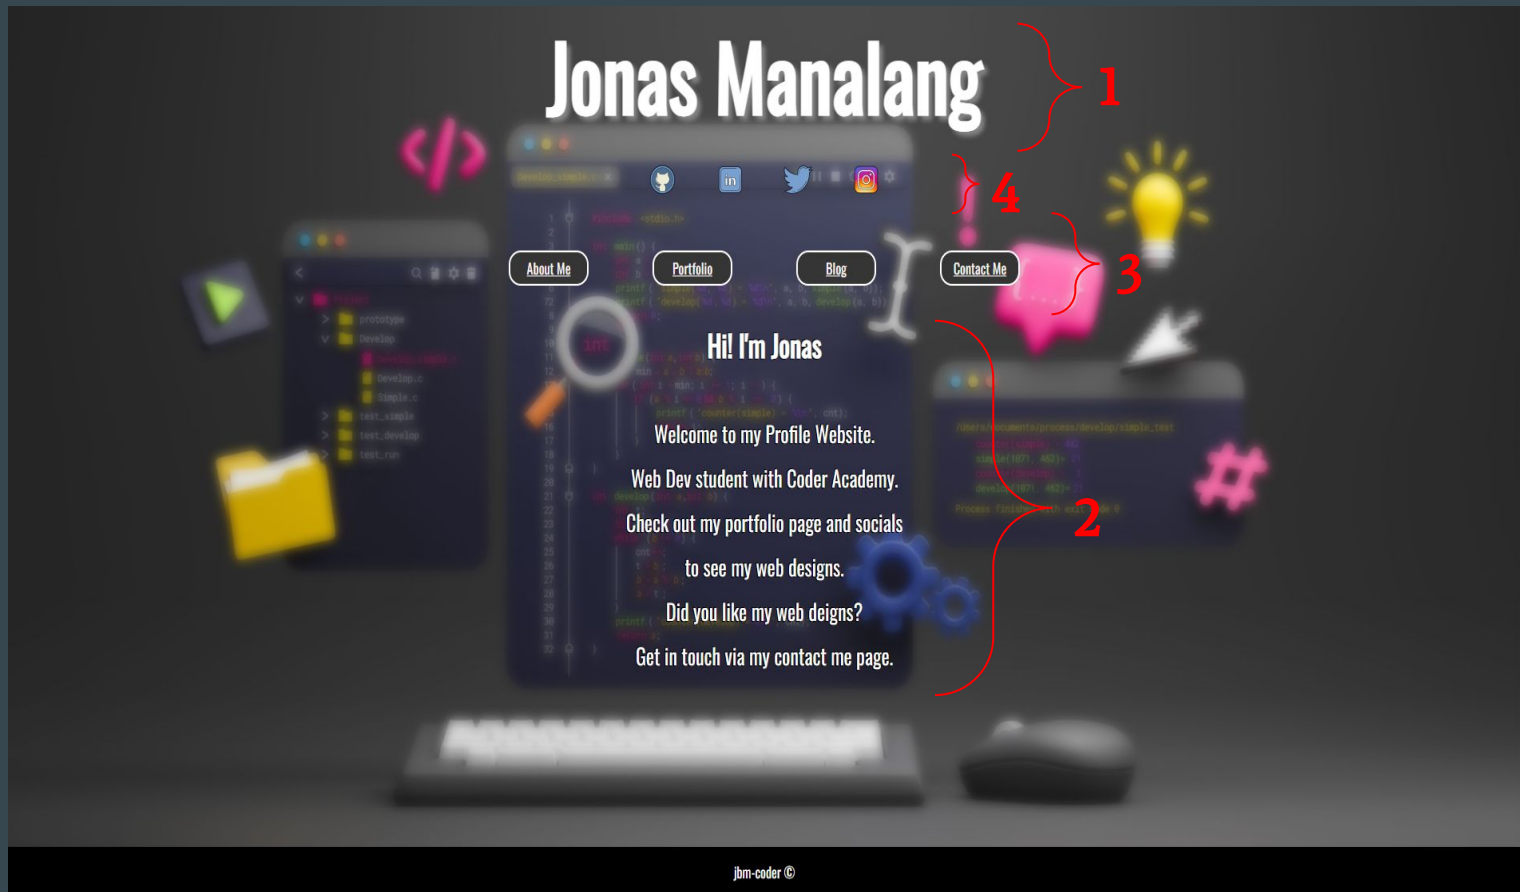

For graphical components I utilized small images and thumbnails rather than full size images as an effective way to entice my audiences to read through my website and properly get to know me, my skills, interest and professional background.

I used responsive card layout to present a summary of information and a linked entry point to my contents.

There is a list of my contact details, but also a form to provide my audience a choice of their preferred mode of contact.

Predominant tech stack I used for my website is HTML and CSS and I utilised both flexbox and css grid to deliver my website.

Visual Hierarchy

Jonas Manalang

I've worked in different industries, from banks to construction and most recently in local government.

I bring a lot of different industry experience that can help you with your project and achieve your desired results.

I have many different interests from financial markets, architecture and sports.
